LAUNCH OF THE CRIVAPE ON THE OCCASION OF THE WORLD NO TOBACCO DAY, MAY 31ST 2018

Nowadays, the knowledge, the transparency and the quality of vaping products are critical issues in order to fight against smoking. In the absence of credible scientific studies on the health consequences of vaping, the creation of the CRIVAPE is a scientific answer, which aims to feed the public health debate and to cut off alarmist polemics.

PRESENTATION OF THE CRIVAPE

The Research and Innovation Center for the Vape (CRIVAPE) is an independent organization which contributes to providing scientific knowledge about vaping, to smoking cessation and to potential applications in the health field. It is managed by Sébastien Roux, Doctor of Science, Engineer.

THE CRIVAPE'S MISSIONS

The CRIVAPE's mission is to provide good scientific quality information to public authorities, health professionals, vape actors and the general public.

The unique positioning of the center focuses on three activity sectors, guaranteeing its self-financing :

- Analysis and validation of the compliance of existing vape products
- Applied research, geared towards the private sphere as well as the public or semi-public partnerships
- A scientific expertise, to study potential applications of the vaping process in the health field and to make better information available to professionals and to the general public

APROPOS

Created in 2016 on the Gaïatrend group's initiative, the Research and Innovation Center for the Vape (CRIVAPE) is an independent organization which contributes to providing scientific knowledge about vaping, to smoking cessation and to potential applications in the health field. It is composed of a research team of 20 multidisciplinary scientists (technicians, engineers, doctors).
